PERSONAL PROFILE

I am a frontend developer with professional experience in IT industry. Currently work using Javascript framework (Vue.js). When I'm not working, I love playing online games, futsal, and watching film.

WORK EXPERIENCE

Frontend Developer
travling.id | Nov 2019 - present

- Created landing page (travling.id) as user platform to order tour package, hotel, and car rent in two destinations (Yogyakarta and Banyuwangi).
- Modified content management system as admin platform to input data that sent to database and used in landing page.
- Applied design from UI Designer into website interface including responsive design using Nuxt.js, one of Vue.js framework. Nuxt.js is used for server-side rendering.

Software Engineer (Internship)
PT. Telekomunikasi Indonesia | Jan 2018 - Feb 2018

- Modified telegram bot that gives notifications to employees in information system section when there is a down server in East Indonesia area.
- Created information system to help employees in managing incoming and outgoing devices so it can be monitored by manager.
